

WHAT OUR GRADUATES SAY

THE TRUEST MEASURE OF OUR SUCCESS IS THE THANKS WE RECEIVE FROM OUR RSO-1 GRADUATES

"I had some previous knowledge on ionizing radiation physics, hazards and common ways to control it in the workplace but was hesitant to assume any of the RSO responsibilities mostly due to lack of knowledge on legal requirements. At the end of the course I not only became familiar with the legislation and regulations, but received many useful ideas on how to deal with specific situations at work. Many thanks for the great course!"

"All of the instructors were very enthusiastic about the content and made an effort to relate participants' experiences to the material being covered."

"It was great to have instructors who were so knowledgeable and approachable."

"I have taken many courses over my career, but I have never benefited from nor enjoyed a course more than this one. Primarily the instructors were excellent but they also were fair. They presented the material in a practical way while still keeping the subject matter interesting and challenging... Thank you for making the topic presentable and practical while effectively teaching and clearly presenting important information and technical data on a difficult, well regulated industry."

Founded in 1980, the Radiation Safety Institute of Canada is an independent, national organization dedicated to promoting and advancing radiation safety in the workplace, in the environment and in the community. Our commitment to the principle of "good science in plain language®" underpins everything we do.

According to United Nations officials, the Radiation Safety Institute of Canada is the only independent organization of its kind in any UN member country.

We offer a broad range of educational, technical and scientific services to industry, government and labour organizations, health care providers, communities and individuals across Canada and around the world. The Institute is known among our friends and customers for the high quality and scientific integrity of our work and the practical, helpful assistance of our people. Our unbiased information service receives hundreds of calls and e-mails every year for information and assistance on workplace radiation issues.

The Radiation Safety Institute of Canada is incorporated under the laws of Canada as a not-for-profit corporation and is also a registered charity (CRA# 0737171-21-13).

How did you learn about the Institute: _____

SESSION (please select the session you wish to attend):

- Feb. 14 - 18 Apr. 11 - 15 May 30 - June 3
 Sept. 19 - 23 Nov. 28 - Dec. 2

FEE:

- \$2150.00 (Fee + \$279.50 HST = \$2429.50) includes course manual
 Add \$299.00 (Fee + \$38.87 HST = \$337.87) to purchase the "Basics of Radiation Safety" training guide on CD-ROM.

PAYMENT METHOD:

- Visa Mastercard American Express Cheque

Cardholder Name: _____

Card Number: _____

Expiry Date: _____ / _____

WHO SHOULD TAKE THIS COURSE | For example: Health & Safety Professionals, Industrial Hygienists, Radiation Specialists, Radiographers, Imaging Technologists, Facilities Managers

If your company or organization uses radioactive materials under CNSC regulations, you are required to designate a "competent person" to act as the Radiation Safety Officer (RSO). You should be familiar with the latest radiation safety practices, procedures and government regulations.

HOW YOU LEARN | A dynamic mix of lecture, active discussion, daily assignments and a final exam sets the RSO-1 program apart from any radiation safety course you've ever taken.

This is supplemented with a 700 page training manual which includes copies of all slides, assignments and tests. The manual also includes a full self-study guide to help you ensure that you get the most out of the program materials.

A COMPREHENSIVE CURRICULUM | Passing the course enables you to write the Canadian Radiation Protection Association's professional registration exam. Topics covered include:

Workplace inspections and audits; Biological and health effects of radiation exposure; Radiation detection, instrumentation and calibration; Transport of radioactive materials; Regulatory agencies and standard-setting organizations; Licensing of nuclear substances and radiation devices; Key sections of the Nuclear Safety and Control Act and Regulations.

CANCELLATIONS | Notice of cancellation must be given two weeks prior to the date of the course. Substitutions are welcome and registrants can be accommodated in other sessions of the 2011 RSO-1 at the Institute's discretion. An administrative fee of \$500.00 (plus 5% GST) will apply to all refunds. Registrants who fail to attend the course or cancel after the deadline date shall be liable for the entire fee. The Radiation Safety Institute reserves the right to cancel or reschedule a program.
